### Boiler for envelope coating BG-40

#### DESCRIPTION

A modern model of a dragee boiler for applying film coating on the surface of tablets and dragees. The machine is equipped with a new computer control panel, a temperature control system and a touch screen that provide easy operation, high efficiency, energy saving, and easy cleaning and safety. Loading 40 kg. Weight 550 kg. Suitable for use in the industrial production of tablets and dragees.

Maximum automation of the process. Made of stainless steel with GMP standard. We provide detailed instructions for setting up equipment for coating the shells of tablets. Before shipping to the customer, the equipment is checked and tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. Price is indicated with the delivery to the city of the client.

## SPECIFICATIONS

Boiler for film coating "BG-40"

Main machine

Maximum capacity: 40 kg

Main power: 1,1 kW

Drum speed: 3-28 rpm

Overall dimensions: 1180mm x 1850mm x 1520mm

Main machine weight: 550 kg

Highly efficient filter air heater

Power: 1,1 kW

Overall dimensions: 810mm x 700mm x 1720mm

Weight: 300 kg

Dust-cleaning exhaust fan

Power: 2,2 kW

Overall dimensions: 730mm x 730mm x 1660mm

Weight: 300 kg

Power of two target steam and electro thermal insulating mixer: 4 kW

## ADDITIONAL INFORMATION

The boiler is GMP compliant. It is widely used in pharmaceuticals, as well as in the food industry, being an ideal equipment for coating tablets, pills, sweets, chocolate with liquid film coating, organic or sugar coating. The main body is made of imported stainless steel, it is equipped with explosion-proof motor and frequency converter, cleaning device, computer control system, software control function and touch screen display device. A nozzle with hot air is injected into the boiler. The heated surface of the boiler makes it possible to maintain the temperature of the sugar syrup and distribute the coating evenly over the entire surface of the tablets. The introduction of the coating agent into the tablets is effected through a built-in spray system. Using a stainless steel boiler will allow you not to worry about oxidizing the work surface. The design of the boiler is made of stainless steel, which allows the use of detergents in the daily operation of equipment.

<b>PRODUCTION TIME</b>	<b>30-40 DAYS</b>
<b>ESTIMATED DELIVERY TIME</b>	<b>30-40 DAYS</b>

<b>PRICE</b>	<b>7627,12 USD</b>
<b>VAT</b>	<b>1372,88 USD</b>

**VALUE 9000.00 USD**

Payment is made in rubles to the account in Moscow at the rate of the RF Cental Bank

**OUR SERVICES FOR CLIENTS:**

**1) TRAINING OF THE TECHNOLOGY OF APPLYING THE SHELL ON TABLETS.**

To all our customers who purchased equipment, we provide literature on the basics of applying the shell to tablets. We carry out consultations by phone and by correspondence, we help to solve arising difficulties at manufacture on our equipment. We supply spare parts and consumables. We provide services in the sale of used equipment.

**2) COMPLETE MANUFACTURE OF TABLETS.**

We have a wide range of additional equipment for the production of tablets. At the request of the client, we will choose a model of the equipment for coating the tablets with shells, a system for spraying the shell for pelletizing the tablets.

**3) SPARE PARTS SUPPLY**

We cooperate with manufacturers of automatic and table-top coating machines for tablets. We are engaged in the supply of spare parts for any model of drapery equipment purchased in our company.
