Thickness analyzer of the walls of gelatin capsules HD-01

DESCRIPTION

The thickness analyzer is used to measure the thickness of tablets or gelatin capsules. The analyzer measures the thickness of the top and the wall of the capsule. The device gives the most accurate result. High-grade centigrade scale. We provide detailed instructions for setting up this model of the thickness analyzer.

Before sending, the analyzers are tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.
