Analyzer of transparency of injections and liquids CM-01

DESCRIPTION

The transparency analyzer is designed to analyze the transparency of injections and other bottled medical fluids. The three-color fluorescent lamp is controlled by a light sensor, an electronic inductor and shading. We provide detailed instructions for setting up this model of the transparency analyzer.

Before sending, the analyzers are tested and tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.

MANUFACTURER - CHINA
