## ADDITIONAL INFORMATION

The monoblock emulsifier is completely made of stainless steel and anticorrosive aluminum for the production of the following products: creams, gels and liquids. The procedure is carried out automatically, with a duty cycle that uses a stirrer (inserted at the bottom of the tank) and a turbine inserted outside the machine (which raises the product from the bottom of the container and mixes it from above).

The emulsifier allows the product to be heated and cooled slowly and operated under vacuum. The cooling cycle can be programmed with the touch screen. There are models with a volume of 10.20 and 50 liters. There is a detailed instruction in Italian and English with illustrations of the work process.

**PRODUCTION TIME** 30-40 DAYS

**ESTIMATED DELIVERY TIME** 30-40 DAYS

**PRICE** 35593,22 USD  
**VAT** 6406,78 USD

**VALUE 42000.00 USD**
