Filling and capping machine for glass boles XL-20

DESCRIPTION

Automac equipment for pouring liquids into glass boles, followed by capping rubber stoppers and aluminum caps. Automated supply of glass boles, stoppers and caps from storage bins. Doses of liquid are regulated. The capacity is 1800 boles per hour. Weight 500 kg. Made of high quality stainless steel.

We provide detailed instructions for setting up equipment for boling and capping. Before sending the machine to the customer, they are checked and tested in production. Rotang table for automac feeding of boles is included in value. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. Price is indicated with the delivery to the city of the client.

MANUFACTURER - CHINA

SPECIFICATIONS

The machine for filling and capping glass vials "XL-20"
Number of pumps: 2 pumps
Maximum productivity: 1800 vials per hour
The used vial: vial 20,50,100,200,250,300 ml
Glass vial or plastic vial (on request from 10 to 50 ml)
Dilution error: 0-2%
Accuracy of sealing and rolling: $\geq 99\%$
Power supply: 220V, 50Hz
Power: 1 kW
Overall dimensions: 1800mm x 1100mm x 1200mm
Weight: 450 kg
Shipping Weight: 520 kg

ADDITIONAL INFORMATION

The rotating table feeds empty penicillin glass vials individually to the conveyor belt, which moves the vials to the filling unit. The machine simultaneously fills two vials. Optical sensors monitor the presence of vials. If there is no vial - there is no filling. From the storage bins, rubber stoppers and aluminum caps are fed to the capping units, where the stoppers are clogged with vials, and the aluminum caps are worn on top. Rolling of the caps takes place mechanically, using rotating heads. Ready vials are taken away by an additional conveyor belt. The machine is a filling device on the conveyor line for oral solution, which is used for filling, plugging, crimping glass vials in the volume of 50-300 ml. The filling and sealing operation is combined in this machine with its improved structure and compact structure. The machine has 2 filling points. Great importance is attached to the stability of vials. To make a decision to purchase this equipment, we recommend sending photos and sizes of vials, stoppers and aluminum caps.

PRODUCTION TIME	30-40 DAYS
ESTIMATED DELIVERY TIME	30-40 DAYS

PRICE	15254,24 USD
VAT	2745,76 USD

VALUE 18000.00 USD

Payment is made in rubles to the account in Moscow at the rate of the RF Central Bank

OUR SERVICES FOR CLIENTS:

1) TRAINING WORK WITH FILLING AND CAPTURING MACHINES.

To all our customers who have purchased equipment, we provide literature on the basics of boiling and sealing liquids. We carry out consultations by phone and by correspondence, we help to solve arising difficulties at manufacture on our equipment. We supply spare parts and consumables. We render services in the help on realization of the equipment of pouring out and закупки second-hand.

2) WE COMPLETE PRODUCTION OF LIQUID FILLING.

We have a wide range of additional equipment for the preparation of liquid products. At the request of the client we will select the filling and capping model, equipment for filling liquids, machines for washing and sterilizing bottles, labeling equipment.

3) SPARE PARTS SUPPLY

We cooperate with manufacturers of automatic and semi-automatic filling and capping machines for liquids, hand-held desktop filling machines and we are engaged in the supply of spare parts for filling and capping equipment purchased in our company
