### Filling and sealing machine for plastic tubes HX-6

#### DESCRIPTION

Semi-automatic ultrasonic machine for sealing the edges of plastic tubes in the pharmaceutical, food and cosmetic industries. Manufacture up to 20 - 30 tubes per minute. The diameter of the tubes used is 5-50 mm. The maximum height of tubes is 250 mm. Ideal for research laboratories and pilot production. We provide a full range of services: installation, training, start-up, repair. Simple mechanical design. Instruction for use in English and Russian.

Complies with the GMP standard. We provide detailed instructions for setting up this machine for sealing the edges of tubes. Before sending the machine for sealing plastic tubes are tested and tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. Price is indicated taking into account customs payments in Russia and delivery to the city of the client.

## SPECIFICATIONS

Automac lling and sealing machine for plasc tubes "HX-6"

Producvity: 20-30 tubes per minute

Number of cells in the carousel: 10 pieces

Tube diameters: 5 to 50 mm

Tube type: plasc

Dosage types: A (3-30 ml), B (6-60 ml), C (10-120 ml), D (25-250 ml), E (50-500 ml)

Maximum height of tubes: 250 mm

Ultrasound frequency: 20 kHz

Engine power: 2,0 kW, 220V, 50 Hz

Overall dimensions: 1700 mm x 1370 mm x 1650 mm

Weight: 380 kg

Shipping Weight: 460 kg

## ADDITIONAL INFORMATION

Semi-automac machine for lling plasc tubes and ultrasonic sealing edges with creams and ointments. It is supplemented with the orientaon funcon of the tube by the label printed on the tube. The system of applying the expiraon date and batch number is applied. Also there is a mechanism for trimming the edge of the tube. Used in the manufacture of cosmeecs, medicines, food. The customer must provide the dimensions of the tubes. The manufacturer makes plasc molds to t the customer's tubes. The design is a rotang table with 10 holes, in each hole is installed a plasc cup for the diameter of the tube. The operator performs only one funcon - sets empty tubes in the glasses. Filling the tube, orienng the photo mark, sealing the edge and pushing out the nished tube automacally. Simple and clear dosage adjustment. If necessary, you can order sets of forms for all the tube sizes of interest. Clamp the edge of the tube is produced by pneumac drive. The height of the pressure lips is adjusted to the height of the tube.

**PRODUCTION TIME** 30-40 DAYS

**ESTIMATED DELIVERY TIME** 30-40 DAYS

**PRICE** 15254,24 USD

**VAT** 2745,76 USD

### OUR SERVICES FOR CLIENTS:

#### 1) TRAINING TO THE TECHNOLOGIES OF TUBING.

We can train you on our equipment before buying. Tesng of materials. We provide consultaons on the organizaon of the producon of plasc tubes, with a full range of addional equipment and consumables.

#### 2) WE COMPLETE LABORATORIES FOR PHARMACEUTICAL PRODUCTION.

We have ultrasonic machines for sealing plasc tubes for the producon of pilot batches in Russia, which we provide to our customers. You can always contact us with your ideas and requests. Currently, the manufacturer of machines for edge sealing tubes can oer equipment for automac and semi-automac use.

#### 3) DELIVERY OF EQUIPMENT FOR WELDING PLASTIC TUBES.

The products fully comply with the new GMP requirements. The release of machines for sealing tubes is accompanied by strict quality control, vericaon of all documentaon, well-organized aer-sales service of equipment.

#### 4) SPARE PARTS SUPPLY

The manufacturer can also oer a machine model for tube sealing, based on the customer's goals and objecves. We will assist in the maintenance and repair of any equipment for lling and sealing tubes. Service center in Russia for the CIS countries.

**VALUE 18000.00 USD**

Payment is made in rubles to the account in Moscow at the rate of the RF Cental Bank
