Labeling machine for boles FE-09

DESCRIPTION

The labeling machine is designed for unilateral or bilateral labeling of glass and plastic bottles, jars, bottles, jerricans, for the installation in the line of packing of gelatin capsules and tablets into plastic bottles. Automatic labeling machine for self-adhesive labeling bottles and bottles. Economical and easy to operate the machine is used in the pharmaceutical, cosmetic and food industries for labeling medicines, cosmetics and beverages.

The output is 150 labels per minute. We provide a full range of services: installation, training, start-up, repair. Complies with the GMP standard. We provide detailed instructions for setting up this model of the labeling machine. Before sending the machine for labeling, the machine is checked and tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.

MANUFACTURER - CHINA
