Machine for filling liquids in plastic packaging BB-153

DESCRIPTION

A compact machine for pouring liquids into a soft plastic bag. It is used for pouring hot herbal decoctions. The machine forms rolls of roll plastic. There are three liquid tanks controlled and programmable heating. Doses of liquid are regulated. The capacity is 480 bottles per hour. Weight 150 kg.

We provide detailed instructions for setting up equipment for boiling and capping. Before sending the machine to the customer, they are checked and tested in production. We help with the purchase of roll materials for packaging. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. Price is indicated with the delivery to the city of the client.
