ADDITIONAL INFORMATION

Prepared for packing tea is loaded into a storage bin. The dosage of servings is done in bulk. The table with the holes rotates and the porons are moved to the formaon zone of the sachet. The lter paper is fed from the roll to the dosage zone. The machine forms a sachet with three seams. Aer the tea bag is formed, it is moved by the transporter to the packaging unit. From the roll material an envelope is formed, into which the tea bag is automacally placed. The nished packages are loaded into the cardboard box at the boom of the machine. Shelf life and batch number cause a special printer that comes with the delivery. The required sengs and parameters are controlled by the operator on the electronic control panel.
